

ANDALE MICRO MATIC

DISPENSE EQUIPMENT 2023

DEDICATED TO
DRAUGHT QUALITY

DEDICATED TO DRAUGHT QUALITY

Andale Micro Matic have been manufacturing beer dispensing equipment since 1947. From humble beginnings in a small factory in the Victorian suburb of Brunswick, to a national company with outlets in Brisbane, Adelaide, Sydney, Somersby (N.S.W.) and Melbourne, Andale have grown to become Australia's largest manufacturer, supplier and installer of beer dispensing equipment.

The team at Andale Micro Matic are passionate about what they do and this is displayed in the products produced. Our philosophy wherever possible is to manufacture everything in-house to meet Andale's strict quality guidelines.

A further extension of this philosophy is Andale employing our own staff to install our Australian made beer dispensing systems. This helps to maintain the high quality standards that have become Andale's trademark within the industry.

At Andale, we believe the integrity of the product dispensed through our equipment must not be compromised, to provide a beer that is presented as the brewer intended. Cold, clean and fresh

History has shown that Andale Micro Matic's innovative design and manufacture of beer dispensing equipment has been at the cutting edge of the industry and helped to enlighten customer's awareness of the delights of tap beer.

Andale Micro Matic - A Passion for Tap Beer

To compliment our range of high quality beer dispensing equipment, Andale Micro Matic stock the following high quality brands;

- Micromatic dispensing equipment
- Valpar tubing
- Bevco Beer Coolers
- ITT Flojet pumps and accessories
- Oetiker Clamps
- Armacell insulation
- Grundfos Pumps

ANDALE MICRO MATIC

FONTS AND DRIP TRAYS

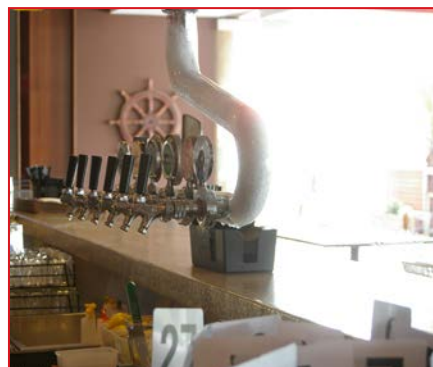

100% AUSTRALIAN MADE SINCE 1947

DEDICATED TO DRAUGHT QUALITY

Andale Micro Matic's range of beer dispensing equipment is 100% Australian made. After sourcing the highest quality raw materials, Andale uses a state of the art CNC engineering workshop to design and manufacture our range of beer dispensing equipment.

From machining, welding, polishing, electroplating, assembly and testing every Andale Micro Matic product is proudly made in Australia.

FINISHES

Andale Micro Matic's range of beer fonts are available in a wide range of decorative finishes. As Andale Micro Matic manufacture all of our beer fonts in-house and have our own electroplating division, we have the flexibility to supply a comprehensive range of finishes.

Andale Micro Matic can also produce fonts with a powder coated finish in a range of Dulux colours giving you the choice to install a beer font in a custom finish. *(* Finishes are part of the Premium Range)*

ABOUT ANDALE MICRO MATIC'S INSULATED FONT

Andale Micro Matic's Insulated font is designed to reduce system loading and power consumption. The Insulated font features a fully flooded font with an insulated cover. The Insulated cover helps to eliminate condensation and ice formation. By insulating the font the required refrigeration loading is reduced, saving power and helping to provide a lower carbon footprint.

ANDALE MICRO MATIC

CLEANING PRODUCTS

A CLEAN GLASS PROMISES FRESH BEER TASTE!

BEER CLEAN GLASS RESULTS

- Enhanced aroma and taste.
- Retains a thick, creamy, foam head.
- Beer is sparkling clear and free of gas bubbles.
- Repeat business and added profits.

BEER CLEAN GLASS FACTS

- All glasses should be washed at least once a day.
- Odors and invisible film from smoke can occur in a matter of hours.
- Avoid dishwashing detergent. Surfactants and hand creaming additives will destroy a foam head.

GLASS WASHING TYPES

- For manual cleaning use at least two sinks for:
 1. Washing with glass washing detergent and suitable brush.
 2. Rinsing with pure fresh water.
- For machine washing: Follow the manufacturer's instructions. Never run glassware with pots, pans, dishes and food utensils.

CLEAN GLASS TEST: IS THE GLASS TRULY CLEAN?

SHEETING TEST

Water sheets off glass without forming droplets.

SALT TEST

Wet glass and shake salt into it. Anywhere there is a grease film the salt will not adhere.

LACING TEST

Foam will adhere to the side of the glass after each drink creating rings or a "lacing" pattern. A random pattern will form in a dirty glass.

A dirty glass produces large coarse bubbles and a rapidly disappearing head. A clean glass will form a thick, creamy head and the beer will be clear of bubbles.

ANDALE MICRO MATIC

KEG COUPLERS

For any draught beer or soft drink system the performance of the keg coupler is vital. The keg coupler connects the gas and beverage lines to the keg and ensures a pressurised flow.

Andale Micro Matic offers a full range of standard Standard Couplers.

All our couplers are providing the highest level of safety, user friendly operations, easy cleaning and ergonomic design:

- The stainless steel housing and POM lower part ensures long-term durability of the Micro Matic handle.
- The handle is ergonomically designed for easy and safe operation.
- The full range of Micro Matic keg couplers offer great opportunities for individually branded labels on the handle
- Optional stainless steel or tin-nickel plated brass.

STANDARD COUPLER A-SYSTEM

ANDALE MICRO MATIC

GAS EQUIPMENT

The Andale Micro Matic regulators have been designed to control the flow of CO₂, Nitrogen and mixed gasses for all beverages such as beer and soft drinks.

The regulators from Andale Micro Matic guarantee reliable performance and the stable pressure and flow conditions ensuring excellent pressure setting at any time. Our regulators are produced to high specifications and are tested for durability and long life under all operating conditions. All regulators meet the technical demands in all markets and have, before leaving our plant, gone through a rigorous quality control testing process ensuring accuracy, reliability and optimal performance.

All regulators are available with different working pressures, various inlet (bottle) and outlet threads/connections and with or without shut-off valve.

CO₂ SAFETY

PROTECT *YOUR* WORKERS

CO₂ safety is an important part of the beverage dispensing industry. That's why Micro Matic is committed to the well-being and safety of every professional working in the food service industry. Although education is key, CO₂ safety requires businesses and employees taking action to actually make a change. We believe this is more than just educating individuals, we believe this is about saving lives.

Carbon dioxide leaks are bad news. It may seem that carbon dioxide is harmless—it's in our atmosphere around us and you haven't noticed it, right? But, critical amounts of CO₂ can be extremely hazardous.

Handling CO₂, especially in commercial environments requires attention to your safety as well as other's. Doing so is your key to protecting yourself from liability and avoiding accidents or worse: death. Protect your workers and protect yourself!

LOW LEVELS OF CO₂ ARE HAZARDOUS:

2% CO₂ LEVEL: Drowsy feeling

3% CO₂ LEVEL: Blood pressure rises & hearing can be impaired

5% CO₂ LEVEL: Breathing will become difficult resulting in feeling confused

OVER 5% CO₂ LEVEL: Unconsciousness and possible death may occur

MOBILE BARS AND PORTABLE EQUIPMENT

COLD PLATE COOLERS

An Andale Micro Matic Cold Plate Cooler is a simple and convenient way to dispense ice cold beer anywhere, any time. All you need to do is fill the cooler with ice and the "Cold Plate" inside the cooler acts as a heat exchanger which chills your beer. Simple, convenient and portable. Our cold plate coolers are used by all of Australia's major breweries, catering companies and keg hire experts.

COLD PLATE

STANDARD FEATURES

- Available in single or double coil
- 5 metre x 1/4" OD beer coil
- 100% Australian made

COLD PLATE COOLER

STANDARD FEATURES

- Snaplok outlet
- 2 metre beer lead
- Cold plate
- No electricity required. All you need is ice to chill your beer
- Durable Eskey brand cooler
- Available in a pack complete with tap or beer gun, gas regulator and keg coupler
- 100% Australian made

DELUXE COLD PLATE COOLER

STANDARD FEATURES

- Snaplok outlet
- 2 metre beer lead
- Cold plate
- No electricity required. All you need is ice to chill your beer
- Available in a pack complete with tap or beer gun, gas regulator and keg coupler
- Also available as a high volume version with an 11kg cold plate and 6m x 5/16" coils
- 100% Australian made

DELUXE COOLER WITH FONT

STANDARD FEATURES

- Chrome beer font
- Snaplok outlet
- 2 metre beer lead
- Cold plate
- No electricity required. All you need is ice to chill your beer
- Portable and durable cooler
- 100% Australian made

ANDALE MICRO MATIC

FLEXIDRAFT™

Increasing the quality of the beer you serve will help you maximize the potential of your business. Experience speaks for itself. Good draft beer sells better.

We all know what a bad beer tastes like. And we'll never hurry back to the same place to get another one. Great beer, on the other hand, turns your customers into walking adverts for your business. Increasing your revenues and winning you new customers, every day.

The One-Way Beer Line completely changes the draft business. It keeps the beer fresh and eliminates the hidden costs of conventional systems related to cleaning and maintenance.

It is easy to change and ensures a perfect beer every time. And most importantly, it makes draft beer more profitable for breweries and outlets.

FLEXIDRAFT™ STAR

Free-standing and mobile systems.

FlexiDraft™ STAR is an integrated solution that combines all the benefits of a full branded FlexiDraft™ font with flexible cooling options in different sizes, allowing up to four taps on each unit.

FlexiDraft™ STAR comes with professional, durable fridges for more accurate and eco-friendly cooling.

The STAR range is easy to install (Plug & Play) and our selection of different fridge sizes is suitable for a wide range of common keg combinations.

FLEXIDRAFT™ STAR 15

ANDALE MICRO MATIC

TUBING & PYTHON

Valpar Micro Matic is recognised as one of the world's leading manufacturers of Tubing & Python for the dispense industry. State of the art extrusion machines - capable of high precision output - are utilized to manufacture Valpar Micro Matic high quality Tubing & Python.

Valpar Micro Matic are specialists in the art of monolayer and multilayer extrusion, bringing you a vast range of solutions to meet and exceed the needs of dispensing today and into the future.

Whether it is for a small bar at an open air concert or for a major entertainment arena, Valpar Micro Matic provide customised, quality, high performance solutions tailored to you:

- Protecting taste
- Colder temperatures
- Improved hygiene
- More energy efficient
- And most importantly, within your specification

All Valpar Micro Matic beverage tubing complies with EU Regulation 10/2011 for "Plastic Materials and Articles intended to come into contact with food".

Our tubing materials also comply with the Code of Federal Regulations issued by the Food and Drug Administration (FDA), Title 21; in particular paragraphs CFR 177.1520 - Olefin Polymers, CFR 177.1500 (b) (5.1) - Nylon Polymers; CFR 177.1350 - EVA Copolymers.

ANDALE MICRO MATIC

BEVERAGE TUBING SOLUTIONS

ANDALE MICRO MATIC

SUPERFLEXMASTER

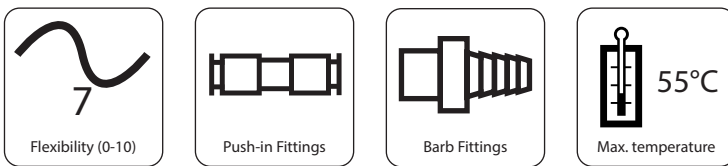

DESCRIPTION

This is a two layer tube offering good flexibility and hygiene. Suitable for most cold drinks dispense systems.

FEATURES & BENEFITS:

- Good flexibility - better than MDP and EVA
- Ultra-smooth inner layer
- Taint free
- Improved hygiene – Reduced line cleaning over MDP

SPECIFICATION HIGHLIGHTS:

APPLICATIONS:

TECHNICAL SPECIFICATIONS:

Ø, Inner/outer in mm
4.0 x 8.0
5.0 x 8.0
6.0 x 9.5
8.0 x 12
10.0 x 15.0
12.7 x 17.4

TUBING LAYERS:

ANDALE MICRO MATIC

BREWMASTER 2 (BAM)

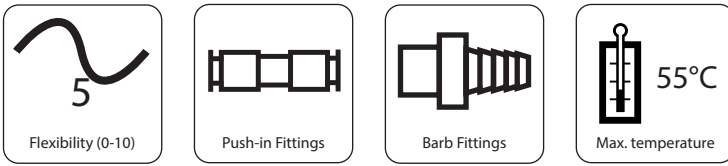

DESCRIPTION

A multilayer nylon lined tube developed to increase hygiene and product quality within the beer industry.

FEATURES & BENEFITS:

- Highly engineered for consistent quality
- Taint free and ultra-smooth inner layer
- Low gas permeation and reduced bacterial growth
- Maintains carbonation levels of dispensed product
- Available with UV protection for outdoor applications, primarily as a dispense gas line

SPECIFICATION HIGHLIGHTS:

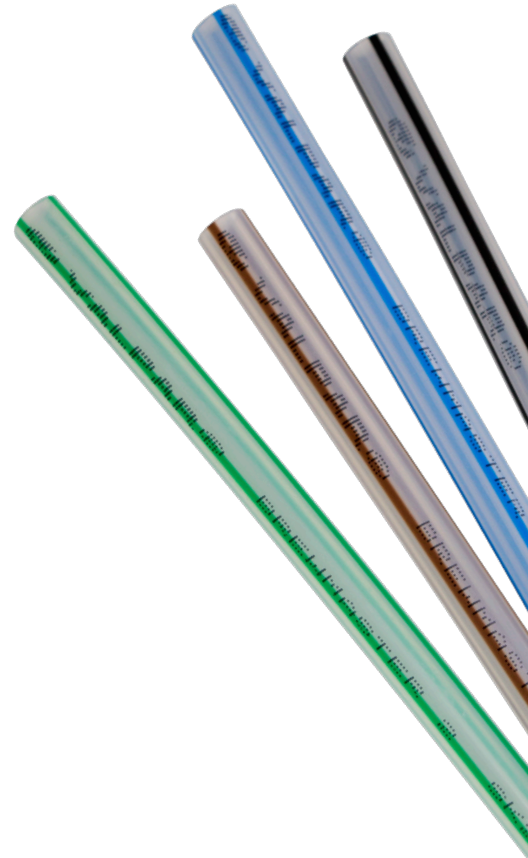

APPLICATIONS:

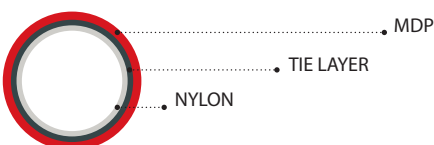

TECHNICAL SPECIFICATIONS:

Ø, Inner/outer in mm
4.0 x 8.0
5.0 X 8.0
6.3 x 9.5
8.0 x 12.0
9.5 x 12.7

TUBING LAYERS:

ANDALE MICRO MATIC

BEVERAGE PYTHON SOLUTIONS

ANDALE MICRO MATIC

TAPED PYTHON

DESCRIPTION

Andale Micro Matic manufacture a range of taped pythons to best suit individual customer requirements.

Available in different line configurations, tube types/sizes and insulation thicknesses.

FEATURES & BENEFITS:

- Designed to give maximum thermal transfer between cooling and product lines, ensuring lowest possible dispense temperature.
- Lines manufactured to close dimensional tolerances to suit both internal (barb and clip) and 'push in' fittings.
- Consistent product performance.
- Fully customisable for individual requirements (1-24 product lines).
- Tubing within the python can be cabled to allow greater flexibility of the overall python, reducing the minimum bend radius.

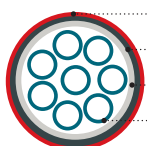

CERTIFICATIONS/APPROVALS:

- All tubing materials comply with EU Regulation 10/2011 - plastic materials and articles intended to come into contact with food.
- In compliance with the relevant paragraphs of FDA Code of Regulation, Title 21.
- Python is fire rated to BS476, Part 7, Class 1 (Surface spread of flame).

APPLICATIONS:

PYTHON LAYERS:

- PROTECTIVE TAPE
- INSULATION
- CLINGWRAP BARRIER FILM
- COOLING/PRODUCT LINES

MOBILE BARS AND PORTABLE EQUIPMENT

TUBING & PYTHON

PYTHON

Python Cable Tie and Bracket

STANDARD FEATURES

- Beer python available with either 6.3mm, 8mm or 9.5mm Brewmaster 2 tubing
- Available with 19mm, 25mm or 32mm insulation
- Custom configurations upon request
- Glycol python available
- Post mix python available
- Eco X Energy python available
- Q-guard python available

ANDALE CARE SERVICE

For a free quote call Andale Micro Matic.

Australia's largest manufacturer, supplier and installer of beer dispensing equipment.

From preventative maintenance service to the installation of beer dispensing systems in Australia's largest stadiums, clubs and hotels, no job is too big or too small, Andale Micro Matic can do it all.

Prevent costly breakdowns and take advantage of our experienced crew and their exceptional expertise.

We can:

*Train your staff;
Look over your system to improve efficiency;
Clean your taps;
Check your gas system is safe;
Ensure your beer is chilled;
Ensure your beer is dispensed correctly;
...and many, many more cost saving measures.*

YOU CAN TRUST ANDALE MICRO MATIC

Leaders in

- Sales
- Service
- Installation

Since 1947

DEDICATED TO DRAUGHT QUALITY

Quality is key in everything we do. Based on our experience, know-how and commitment to customer service, we create state-of-the-art beer dispensing solutions, pioneer educational programs and develop creative new point-of-sale merchandising.

If you can't find what you need in the catalogue, visit your nearest Andale Micro Matic showroom to see our comprehensive range of beer dispensing equipment for yourself, or contact your nearest Andale Micro Matic outlet to discuss your beer dispensing requirements.
